AIRWAVES
Phantom Seat Harnesses

Set
AC48-24

This detail set is manufactured from photo etched brass sheet and is meant for use on Martin Baker MB-7 seats in model kits. Use a sharp modelling knife on a firm surface (such as a ceramic tile) to separate components from frame, cutting as near to the part as possible. Tag sections can be cleaned by holding part in pliers and using a fine file. To fold part support up to line of fold in pliers and bend in one go using the blade of a screwdriver for leverage. For assembly use superglue or epoxy, using only epoxy on clear parts. Prior to painting ensure that parts are fully defluxed by cleaning in detergent and rinsing in clean water. Dry parts thoroughly and prime with either self etching primer or matt enamel. Position of parts in diagrams is for guidance only, for final positioning and colouring consult reference material.

Airwaves are designed and manufactured in the Midlands for E.D. Models, 64 Stratford Road, Shirley, Solihull, West Midlands B90 3LP, England. Telephone: - 021-744-7488.

Our thanks to Del Holyland of Martin Baker for his assistance in the preparation of this set.
