

These replacement flying surfaces are manufactured from polyurethane resin and are meant for use on the Hasegawa and Italeri models of the Focke Wulf FW190A/F, and can be used in conjunction with the Airwaves brass detail sets for the same. Seam lines and any flash can easily be removed by carefully scraping with a sharp scalpel blade and finishing with wet wet and dry paper. Prior to fitting and painting, wash parts in soapy water. Parts can be fixed with either superglue or five minute epoxy resin. Airwaves are distributed by E.D. Models, 64 Stratford Road, Shirley, Solihull, West Midlands B90 3LP, England. Telephone: 021-744-7488 Fax: 021-733-2591.
