

Set SC72-69

AIRWAVES JAGUAR SLATTED WINGS

These wings are manufactured from polyurethane resin and should be used in conjunction with Airwaves Jaguar cockpit detail set AC72-39 on the Hasegawa kit. The wings are a straight swap for the kits plastic parts but allow for flaps and slats to be fully deployed. Prior to use wash in cold soapy water and rinse in clean. Any flash or seam marks can easily be removed by scraping with a sharp scalpel blade and rubbing with wet wet and dry paper. Glue in position with superglue or five minute epoxy, fill if necessary and finish as desired. Airwaves are distributed by E.D. Models, 64 Stratford Road, Shirley, Solihull, West Midlands B90 3LP, England. Telephone: 021-744-7488, Fax: 021-733-2591.
